

Marine Superintendent (fulltime)

Location: Goes, NL (on site)

Date: October 2025

About us

OOS Energy specializes in managing modern offshore drilling and decommissioning units, both floating rigs and jack-ups. We offer complete management services for rig owners who do not have the expertise to operate or maintain their assets. Our activities cover the services required during the energy transition: from conventional drilling projects to plug and abandon campaigns and offshore carbon storage projects.

Job Description

OOS Energy is looking for an experienced Marine Superintendent to support and oversee safe, compliant and efficient marine operations for our offshore units. In this key role, you will manage navigation and communication systems, coordinate class and flag inspections, and act as the main point of contact for all marine-related matters—both internally and with external stakeholders.

You will help maintain vessel documentation, support maintenance planning, participate in incident investigations, assist with budgeting and procurement, and contribute to training, policy development and operational improvements. The role is part of the Emergency Response Team and may act as Alternative DPA.

Job Requirements

- Bachelor's degree in Nautical Science or equivalent
- Strong senior experience in marine or offshore operations (semi-submersibles preferred)
- Solid understanding of maritime legislation, class/flag requirements, and marine systems
- Strong organisational and communication skills, collaborative mindset
- Valid BOSIET and Offshore Medical Fitness certificates

What are we looking for?

- A self-driven, enthusiastic professional with a proactive, hands-on mindset.
- Someone who represents the company professionally and contributes to a positive work environment.
- Commitment to HSE standards, zero-incident performance, and continuous improvement.

What can we offer you?

A role with impact, responsibility and interaction across the entire organisation—onshore and offshore. You will lead a small team, contribute to safe operations, and help drive continuous improvement within a growing company.
