

QHSE Manager (fulltime)

Location: Goes, NL (on site)

Date: October 2025

About us

OOS Energy specializes in managing modern offshore drilling and decommissioning units, both floating rigs and jack-ups. We offer complete management services for rig owners who do not have the expertise to operate or maintain their assets. Our activities cover the services required during the energy transition: from conventional drilling projects to plug and abandon campaigns and offshore carbon storage projects.

Job Description

OOS Energy is looking for an experienced QHSE Manager to lead our Quality, Health, Safety, Environmental and Security management across all offshore operations. In this key role, you will manage and continuously improve our QHSE Management System, ensure compliance with ISO and maritime standards (ISO 9001/14001/45001, ISM, ISPS, MLC), and act as the primary link between our vessels and shore organisation.

You will oversee audits and inspections, lead incident investigations, maintain safety statistics, support tenders with QHSE input, and ensure robust emergency preparedness across the company. As DPA, you safeguard the effectiveness of the Safety Management System and support vessel operations in maintaining safe, compliant and secure performance.

Job Requirements

- Bachelor's degree in Marine Engineering, Nautical Science, QHSE or similar
- Strong QHSE background in offshore, marine or oil & gas
- Solid knowledge of ISO standards, ISM Code and maritime regulations
- Lead auditor experience; familiarity with Class/Flag inspections
- Excellent communication, leadership and organisational skills
- BOSIET and Offshore Medical Fitness certificates

What are we looking for?

- A self-driven, enthusiastic professional with a proactive, hands-on mindset.
- Someone who represents the company professionally and contributes to a positive work environment.
- Commitment to HSE standards, zero-incident performance, and continuous improvement.

What can we offer you?

A role with impact, responsibility and interaction across the entire organisation—onshore and offshore. You will lead a small team, contribute to safe operations, and help drive continuous improvement within a growing company.
